

## Numbers that come between 2 other numbers

Think of a number that comes between the 2 given.

Example: 234\_\_\_**240**\_\_\_ 242

1. 345\_\_\_354

2. 563\_\_\_ 576

3. 287\_\_\_289

4. 497\_\_\_502

5. 999\_\_\_1003

Now try these:

1. 67\_\_\_90 [must be an even number]

2. 79 \_\_\_85 [must be an odd number]

3. 124\_\_\_164 [ must be in the ten times table]

4. 356 \_\_\_390 [must be in the 5 times table]

5. 987\_\_\_1200 [must have 3 digits]

Super Challenge!

1. 36 \_\_\_62 [ an even number and in the 5 times table]

2. 20 \_\_\_50 [ an odd number and in the 3 times table]

3. 40 and 60 [ the 2 digits must add up to 8]
