Mass problems

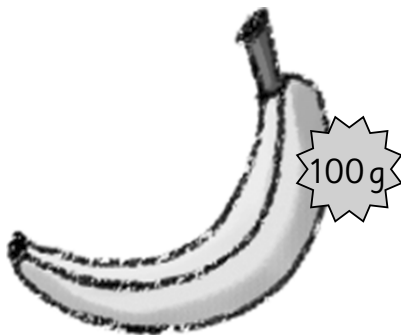

Compare masses by doubling

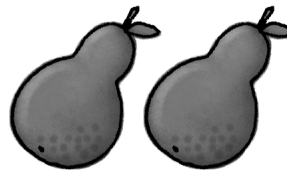

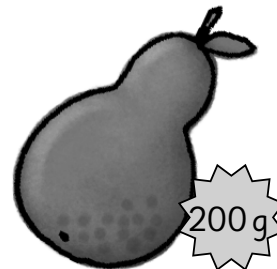

Double the mass = g

Double the mass = g

Double the mass = g

Double the mass = g

Anan wants to buy two of each of these fruits. What is the total mass going to be?

Total mass = g

Teacher's notes

Children double the masses of the fruits and then add them together. Encourage them to use what they already know to double the amounts, for example double 5 is 10, so double 50 must be 100.
