

Book suggestion by Mrs Brooks

12.06.2020

Name of book: Actual size

Author: Steve Jenkins

Summary of book: Just how big is a butterfly? What is the size of a bear's head? This extremely intriguing non-fiction book has been a pleasure to explore. Each page gives information about a different animal with an image depicting their actual size. Ranging from the smallest insect to the largest mammal. It is fascinating to compare and contrast the shapes and sizes of these magnificent beasts as well as learning a little more about them. Imagine an eye as large as your palm... Read the book to find out more facts and the actual size of a range of animals.
