Perimeter search

Measure and calculate the perimeter of regular 2-D shapes

Challenge

1 These shapes are made by fitting together five equilateral triangles. The dots are 1 cm apart. Find the perimeter of each shape.

1 P = cm	2 P = cm	3 P = cm	4 P = cm
---	---	---	---

Challenge

2 These shapes are made by fitting together six equilateral triangles. Find the perimeter for each shape.

1 P = cm	2 P = cm	3 P = cm	4 P = cm
---	---	---	---

Challenge

3 Draw three more shapes you can make using six equilateral triangles and find their perimeters.

Work together to measure the perimeter of different rectangular-shaped objects in the home, for example, place mat, magazine cover, book cover, envelope. Write your results on the back of this sheet.
